Tutors

Marco Cantamessa
Francesca Bosio, Francesco Milone, Teresa Monti, Andrea Panelli

The Winter School has the objective of introducing ASP students to the concept of innovation from an academic, cultural and practical perspective. More specifically, it aims at drawing their attention towards the challenges that must be tackled when trying to bring change in a given situation through technical means. This change can arise when bringing technological advances to the market in the form of new products and services and/or when proposing new solutions to satisfy explicit or latent needs.

The School will be held with a blended format (in presence and streaming) for the first part, which is focused on theoretical contents, and in presence for the second part, which is focused on project work.

March 2nd – March 18th – Lectures and thematic meetings

During this period, students will have the opportunity to attend lectures, discussion events, and meetings with managers and innovators. The list of lectures and lecturers follows:

A long voyage, from Aeneas to Elon Musk

Marco Cantamessa, Politecnico di Torino, Department of Management and Production Engineering
Lecture, March 2nd, 17.30-19.30 CET, Room 10 Politecnico di Torino and Teams

Change: Threat or Opportunity? Managing Disruptive Change in the Current Economic Scenario

Innovation and Economic Growth. Growth in Advanced Economies and Key Innovation Drivers
Marco Magnani, Harvard Kennedy School and LUISS – Libera Università degli Studi Sociali Guido Carli
Lecture, March 4th, 17:00-20:00 CET, Room III.B Milano Città Studi – Building 11 Politecnico di Milano and Teams

From Invention to Innovation

Marco Cantamessa, Politecnico di Torino, Department of Management and Production Engineering
Lecture, March 9th, 17.30-19.30 CET, Room 10 Politecnico di Torino and Teams

The Dynamics of Innovation

Marco Cantamessa, Politecnico di Torino, Department of Management and Production Engineering
Lecture, March 11th, 17.30-19.30 CET, Room 10 Politecnico di Torino and Teams

The Financing of Innovation

Elisa Ughetto, Politecnico di Torino, Department of Management and Production Engineering
Lecture, March 16th, 17.30-19.30 CET, Room 10 Politecnico di Torino and Teams

The Management of Intellectual Property Rights

Giuseppe Scellato, Politecnico di Torino, Department of Management and Production Engineering
Lecture, March 18th, 17.30-19.30 CET, Room 10 Politecnico di Torino and Teams

Meet the innovators

Francesco Monti, CEO of Podium Engineering S.r.l.
Online meeting, March 19th, 17.30-19.00 CET, Teams

Milica Pavlovic, Director of Lab Strategy and Engagement, GSK

Online meeting, March 24th, 16.00-17.30 CET, Teams

May 6th-May 8th – Project Work

This period will be held offsite and in connection to the Spring School on “Design Methods and Processes”. Students will apply the concepts and tools that have been discussed in class to their own ASP multidisciplinary projects.

The students will be led throughout the week via a sequence of specific assignments. This will progressively enable them to develop a sound understanding of the industry-specific dynamics within which their multidisciplinary projects are grounded, to define a viable innovation strategy, and to design technical solutions able to fulfil the needs of prospective customers, users and stakeholders.
